**IPFONE Metro Ethernet service is the
cost-effective solution.**

- Get more bandwidth at a lower cost per megabit than traditional private line services
 - Less expensive than mature network technologies, such as Frame Relay or ATM
 - No need to invest in equipment that converts packets of information throughout the network
 - Reduce costs with a router supplied and managed by IPFONE.

Metro E- Fiber Optic

HIGH-SPEED AND HIGH-CAPACITY NETWORK ACCESS

Our comprehensive portfolio of Ethernet services is designed to meet the full breadth of performance, reliability and bandwidth your changing business demands.

MEETING YOUR NETWORKING NEEDS

Whether your business requires high-speed access for your offices, or high capacity to mission-critical data centers, or end-to-end connectivity from 10Mbps to 10Gbps, IPFONE has an Ethernet solution for you.

IPFONE's breadth of service offerings meets demands for new end-to-end high-speed data services and current cost effective solutions. IPFONE Metro Ethernet service can serve your needs with a local footprint as well as access to Internet and VPN services. IPFONE Metro Ethernet services deliver simplicity and connectivity to new and existing services, with industry-leading SLAs.

BENEFITS

- High-speed connectivity at better price points.
- IPFONE offers 24 hours a day, 7 days a week, monitoring and management of your network to ensure maximum performance.
- Service is available in a variety of bandwidths and configurations that can be expanded and changed with ease, to meet your business applications needs.
- With Metro Ethernet data rates you have virtually seamless control of VoIP and IP Telephony services and other networking applications with a simple and consistent transport technology across the LAN or WAN.
- Metro Ethernet service is fully managed which means that you can let IPFONE monitor the network to alert you in the event of a network condition.
- Scalability as your business applications require more bandwidth, Ethernet services can scale quickly and easily, usually without costly equipment upgrades – providing you with a high degree of bandwidth flexibility.
- Reliability delivered by IPFONE's unsurpassed network management expertise and end-to-end servicing and dedicated work centers for all network elements provide you with a single point of contact and around the clock monitoring and management.
